THE CRADLE OF IDEAS

Problem Statement

Kolkata's rich heritage, tram history, old architecture, local stories, and cultural landmarks are scattered across different sources and are not easily accessible to younger generations or tourists.

There is no unified interactive platform that combines heritage exploration, tram routes, historical narratives, gamification, and community engagement in one place.

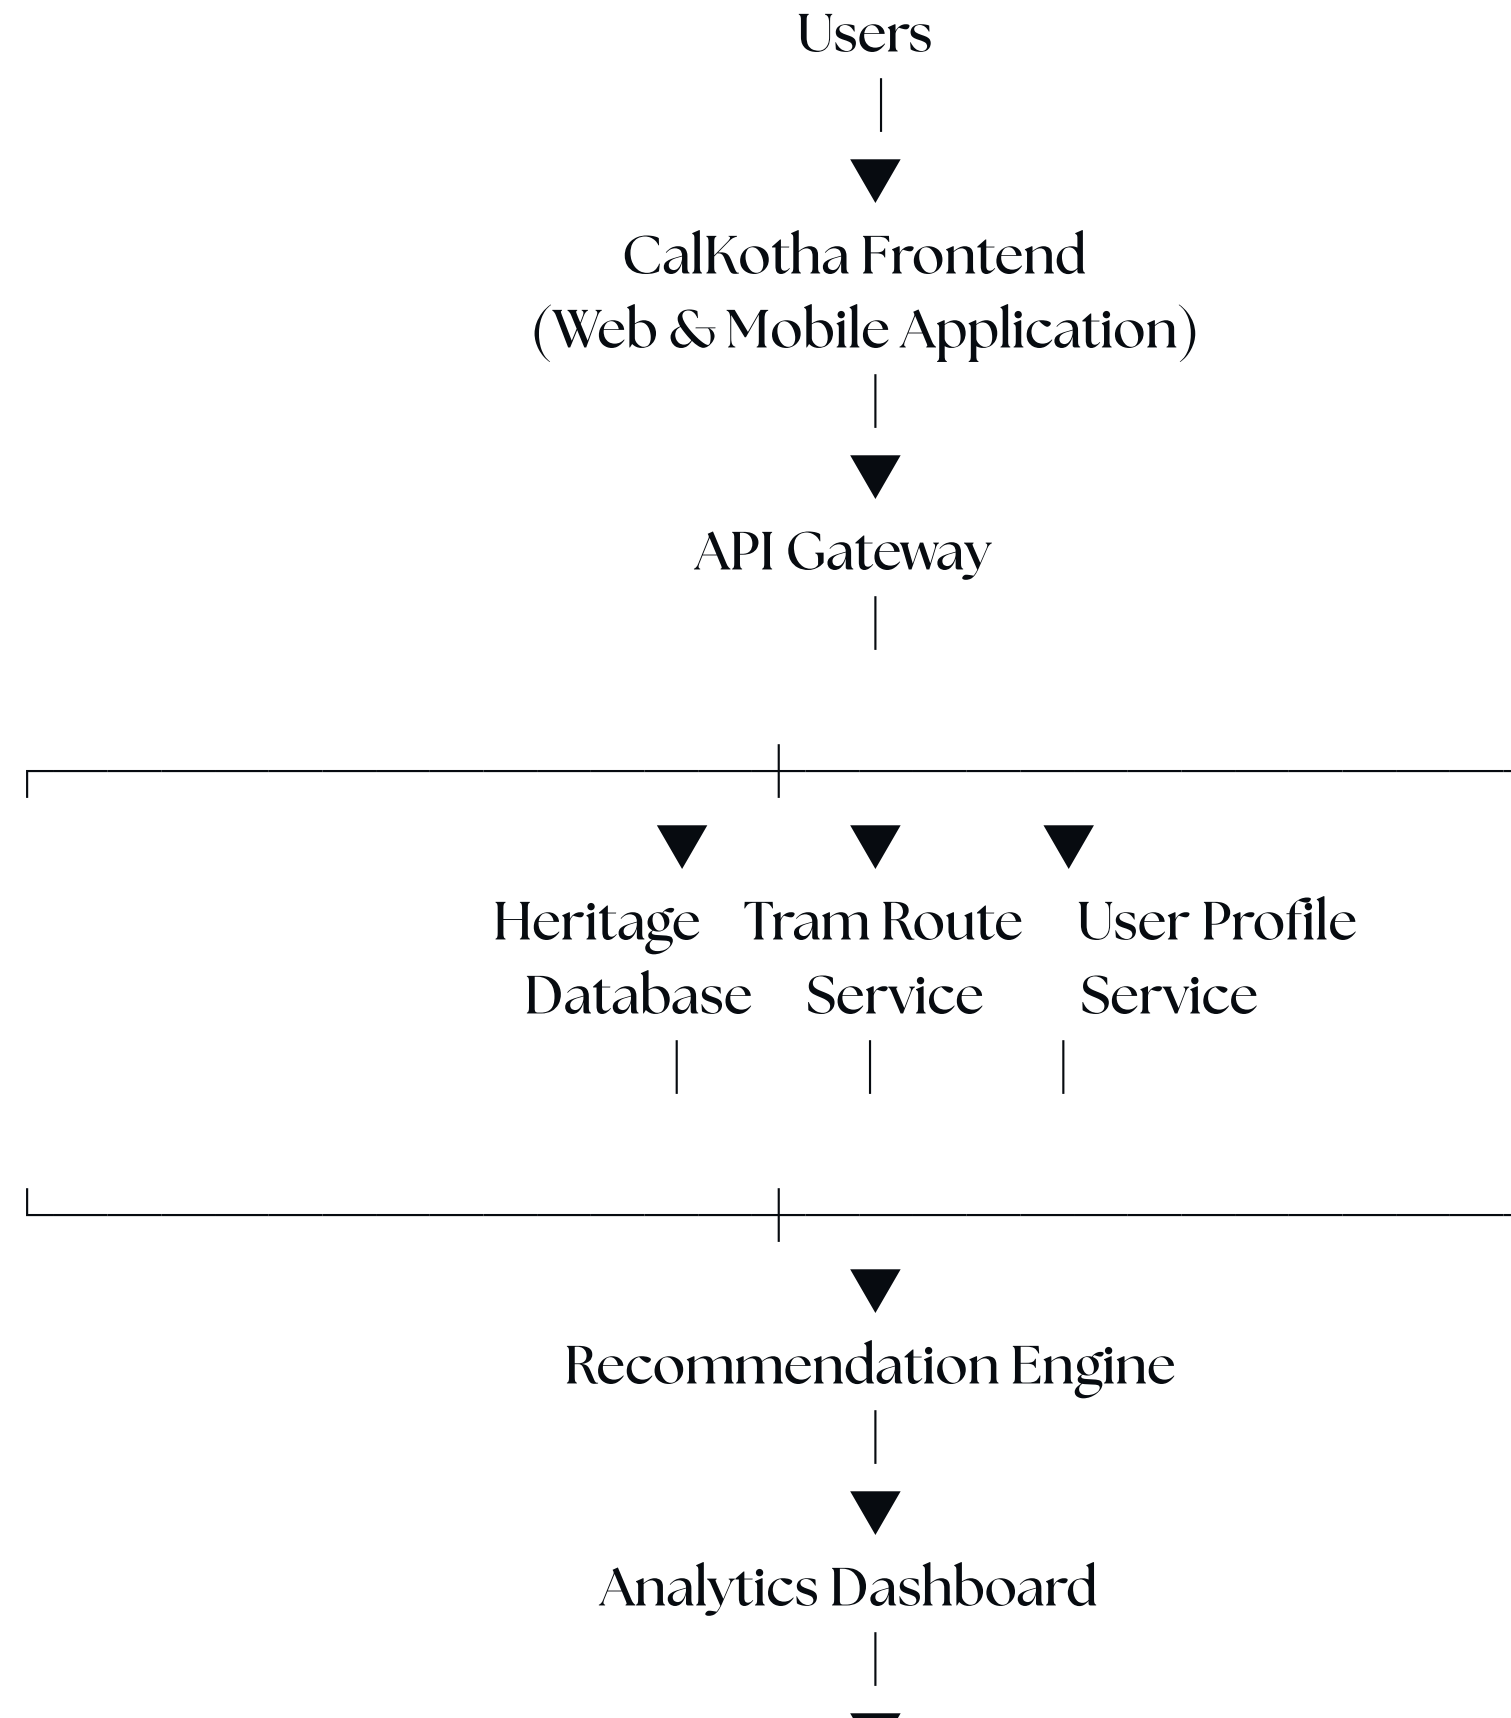

Solution Approach

Calkotha is a digital heritage exploration platform that allows users to discover Kolkata through interactive maps, tram journeys, heritage trails, historical stories, stamp collections, AR experiences, and community contributions. Users can travel virtually or physically through the city, collect digital stamps at landmarks, learn about historical locations, and engage with Kolkata's cultural legacy in a modern and immersive way.

USP of Solution

1. Interactive Heritage Exploration
2. Digital Stamp Collection System
3. Gamified Learning Experience
4. Location-Based Storytelling
5. AR Heritage Visualization
6. Community Contribution Platform
7. Tram Heritage Hub
8. Vintage Modern Interface
